Lei Kai

Senior Full Stack Engineer

Xianyang, Shaanxi, China

----- PROFESSIONAL SUMMARY -----

I'm a Senior Full-Stack Developer, Engineer, and Architect with strong analytical and creative problem-solving skills and a passion for tackling complex technical challenges. I enjoy working both independently and as part of collaborative, high-performing teams.

With an open mindset, a critical eye, and a strong desire to keep learning, I continuously expand my technical expertise and turn ideas into practical, scalable solutions. I'm particularly interested in designing distributed applications, solving challenging engineering problems, and creating valuable innovations.

My experience spans JavaScript/TypeScript, React, Redux, React Native, Angular, Next, Python, Django, and modern full-stack development. I'm comfortable working across the entire development lifecycle - from architecture and system design to implementation, optimization, and delivery.

I'm always looking for opportunities to grow as both an engineer and a professional while contributing meaningful technical value to the products and teams I work with.

----- PROFESSIONAL EXPERIENCE -----

Senior Full-Stack Developer and Team Lead - Camelot Technology Co. Ltd

Jan *2024 - Jan 2026, Beijing, China*

- https://moneyinthepot.com/
- https://camelot.fm/

Improved with others - challenge friends to put their money where their mouth is.

Tech: TypeScrip, Next, PHP(Laravel, CI), Python, C#

Full-Stack Developer - Evidence Locker

Sep *2021 - Dec 2024, Beijing, China*

- *https://evidencelocker.com/*

Evidence Locker was designed and built by digital forensic experts for forensic professionals, law enforcement agencies and legal departments to simplify the process of acquiring and preserving data that resides in the cloud in a secure forensically sound manner.

Tech: React, React Native, NodeJS, PHP, Express, Python, Django, Jest, Cypress, AWS

Full-Stack Software Engineer - Midinote

May 2019 - *Aug 2021, Hong Kong, China*

- *http://midinote.me*

Midinote is an innovative note-taking software. It brings a totally new way to take notes, brings a full tag-based, classification-friendly way to record. With our data visualization mechanism, your notes will be displayed as a mind map in front of you. I built the whole app independantly,

Tech: React, Redux, Jest, Flow, Angular, Express, Node.js, CouchDB/PouchDB, Nginx, AWS, PHP, Python, Djang

Front-End Developer - Shinetech Software Inc

May 2017 - *April 2019, Beijing, China*

- *http://shinetechsoftware.com*
- Leaded a remote front-end development team providing customized software solutions for international clients, including startups based in New York. ❑
- Designed and developed responsive, user-friendly web applications that enhanced usability and customer experience across multiple projects. ❑
- Worked daily with international stakeholders to translate business requirements into scalable and maintainable technical solutions.
- Established clean coding standards, code review processes, and structured workflows to improve team productivity and software quality. ❑
- Worked effectively across isolated teams and time zones, maintaining smooth communication and successfully completing client projects on time.

----- EDUCATION -----

Technical University of China

Master's degree, Systems Engineering and computers *Sep 2017 - July 2019 | Hefei, Anhui, China*

Spatio-temporal index | Jiangsu University

Bachelor's degree, Master of Computer Applications *Sep 2015 - Aug 2017 | Zhenjiang, China*

----- CORE TECHNICAL SKILLS AND LANGAUGAES -----

Frontend Engineering:

- React, Next.js, Vue, Angular, Nuxt, Laravel
- Javascript(ES6+), Typescript
- State Management, API integration
- Responsive & Adaptive UI Design
- Component-based Architecture
- Frontend Performance Optimization

Backend Engineering:

- Python, Java, C#, Node.js
- Django, Flask, FastAPI, ASP.NET
- Laravel(PHP)

AI | ML G Intelligent Systems:

- LLMs(Large Language Models)
- AI-powerd Appication Development
- Machine Learning Model Integration
- RAG(Retrieval-Augmented-Generation) pipelines
- AI Inference Services
- Production AI Feature Integration

Database G Data Engineering:

- PostgreSQL, MySQL, MS SQL Server
- MongoDB, Redis
- Oracle, MarkLogic
- Data Modeling
- Query Optimization & Performance Turning

Cloud, DevOps G Infrastructure:

- AWS(EC2, ECS, EKS, Lambda, S3, RDS, IAM)
- Docker, Prometheus, Kubernetes, Kafka, Azure, Google Cloud Platform
- CI/CD(Github Actions, Jenkins, GitLab CI)
- Infrastructure Automation
- Monitoring, Observability, Alerting, Incident Response
- Cloud Environment Management
- Reliability Engineering

Low-code Platforms:

- Oracle APEX
